Opening Address : Welcome to 3AI BEYOND 2023 – The New Possibilities

Opening Keynote Address

Leadership Roundtable Session : Evolution of AI-first Enterprise – The New Playbook for Growth, Innovation & Transformation

AI is invoking massive shifts in the business value chain of enterprises and is redefining what it takes to accomplish competitive advantage, unleash transformation and upping the innovation quotient. Whilst enterprises have embarked upon the journey of triggering AI strategy for enterprises for growth, scalability and innovation; very few enterprises have developed a full scale AI strategy that's contextualised and enterprise-wide. A deep concerted focus on strategic building blocks of AI can help enterprises develop penetrating insights, intelligence & recommendations.

The session brings together experts and they will focus on strategic discussions on various facets of bringing in need for AI strategy for enterprises to up the ante on competitive differentiation & innovation.

Spotlight Talks [staggered through the event day]

Spotlight talks exhibits different leaders to demonstrate AI & Analytics trends, themes and scenarios in a solo 10 minutes time window amplified in a succinct and crisp takeaway format

Agenda

Session Tracks & Formats

Unplugged Debate : Business Decision Making with AI - Challenge the status quo

As AI era unfolds and dominates the business & technology landscape; Whilst the naysayers have advocated the doomsday for humanity by predicting the advent of singularity, AI for good & all have several applications to usher a new change in how we make decisions at enterprise and personal spheres. Traditionally, human decisions are to a large extent are based on intuition, gut and historical data ...in the age of algorithm economy, several of our business decisions will be taken by algorithms. Algorithms that are personalized, curated and consumed for our own decision making. Leveraging AI, the ability to mimic the human brain and the ensuing ability to sense, comprehend and act will significantly go up and that will result in the emergence of business decision making @scale and an emergence of new playbook at the enterprise level.

The session brings together experts with multifarious background and they will discuss and unravel aspects on AI taking over business decision making and the ensuing impact at the enterprise level.

Agenda

Session Tracks & Formats

RPM (Rapid Pace Masterclass) Sessions [staggered through the day]

RPM sessions will bring forward AI & Analytics experts & practitioners to exhibit impactful use cases and transformative work engagements in CX, Marketing, Risk, Supply Chain, HR, FP&A and allied areas in a pulsating 15 minutes stand alone format

Lounge Specials : The New Next in AI Applications & Adoption – Innovative Models & Approaches

With the emergence of Metaverse, ChatGPT, Web 3.0, 5G, Quantum Computing, BYOE etc. ; unleashing the true power of AI & Analytics adoption requires scaling it across the entire business value chains and calls for reimagining the customer experience, innovating new products & services and transforming the businesses. AI applications and adoption can usher new operating models, influence the business decision making and become a trojan horse for triggering innovation & disruption. Whilst, several businesses are still focused on siloed use cases and disparate POCs, the full potential of AI adoption can only be realized if the enterprise evolve and implement innovative models & approaches for enterprise wide AI adoption.

The session brings together experts and they will focus on strategic discussions on various dimensions of innovative technology led models and approaches for enterprise wide AI adoption.

Agenda

Session Tracks & Formats

5:30 PM

Fireside Chat : Reset the New Age AI Capabilities & Solutions for Scale, Differentiation & MOAT

Nearly 85% of Fortune 1000 CXOs believe AI will allow their enterprises to obtain or sustain scale, differentiation & MOAT in the market place, contrastingly, just one in the five enterprises have incorporated AI in the organization and less than 15% of enterprises have an AI strategy. How does CXOs & senior leaders look at retriggering & resetting the AI capabilities & solutions for their enterprise.

AI & Analytics leaders will dwell upon the global conundrum of pandemic laden market outlook and the need for traditional & new age enterprises to reset the button with new age AI capabilities & solutions for scale, differentiation & competitive advantage. An intense debate you can't afford to miss

Classic Panel Discussion: AI & Analytics CoE & capability hubs in GCCs : Reimagine the NEW

AI is invoking massive shifts in the business value chain of enterprises and is redefining what it takes to accomplish competitive advantage and upping the innovation quotient. AI & Analytics CoE within GCCs are evolving from being cost centres to value drivers of transformation, innovation & disruption. AI & Analytics CoEs are set up not just for cost arbitrage but go all the way to curate best of breed AI & Analytics capabilities & solutions, design topical date to insights infrastructure, tap into robust & capable talent and nurture in-house innovation & transformation. AI & Analytics CoEs are generating significant business impact through AI driven process innovation and revealing new sources of revenue for stakeholders.

The session brings together experts with multifarious background and they will focus on strategic perspectives on the different dimensions of building and scaling AI & Analytics Center of Excellence in GCCs

Conclusion and End of the BEYOND 2023 EVENT

Delegates will have opportunity to participate in intimate networking over three coffee/tea breaks and elaborate buffet lunch
